• SITUATION

Who are we? What has happened?

We are Eleventh Hour Contractors. A small scale PMC on a contract with NATO, We have been called to investigate a military disturbance in the Atlantic.

Last day on this island we succeeded in destroying sensitive US Navy hardware and rescuing US Navy Men captured on the island.

The operation is going forward with a more loud approach as this has now turned into an official operation. still however off the books due to the nature of the event.

A new development in the small scale oceanic conflict has revealed that during our operation the US Landing Ship that was towing the damaged frigate was subsequently attacked and disabled by what we suspect to be a chinese supplied Anti-Ship battery. afterwards it was hauled off to a port on the north western side of the island. however this position is to heavily fortified to assault at this time.

As such our current mission is to disable the enemy forces via equipment sabotage. including their vehicle stores and communication equipment. aswell as gain any possible intel on the involvement of a third party, so far suspected to be the PLA. or at the very least their arms manufacturer, Norinco.

• MISSION
