• SITUATION

Who are we? What has happened?

We are LRG mercenary group Pure Security deployed at the independent Island of Temblan.

After 2 Coups in the last year there is no stable government in Temblan, however there is a drug cartel operating out of this area as well as a fast growing militia trying to take control of the island.

After our valiant efforts we all but destroyed the enemy Militia, also our combat-bonus due to the capture of enemy air assets has granted us enough resources to get some new toys to use in the 2nd stage. There is only a single militia artillery division left, but they completely joined hands with the drug cartel now. There is also armed unrest by a so called democratic party going on in the centre of the capital who has kidnapped several of our employers associates, go rescue them.

Your job is simple find and destroy the enemy artillery division and stomp out any and all cartel positions left on the island. Our employer Mr. Cheng Chong is on the way here and we must have the island under control by the time he arrives.
