1. SITUATION

Who are we? What has happened?

Over the last 50 years, Scientists warned us about it, predicted possible Scenarios and appealed to the Governments, but nobody wanted to listen.

In 2040 we finally got to feel the consequences of 150 years of global pollution, industrial exploitation and reckless mining of raw materials.

Massive Sandstorms, Blizzards, Tsunamis and other natural disasters appeared in an unknown excessive amount, wiping entire Cities of the map. Drastic temperature changes made large parts of the Equator uninhabitable while the Pools and near by areas got plunged into a new Ice Age.

Together with rising sea levels, dwindling natural resources and millions of People seeking refugee from, the already high tensions between the world's Nations escalated into full on war for what remained.

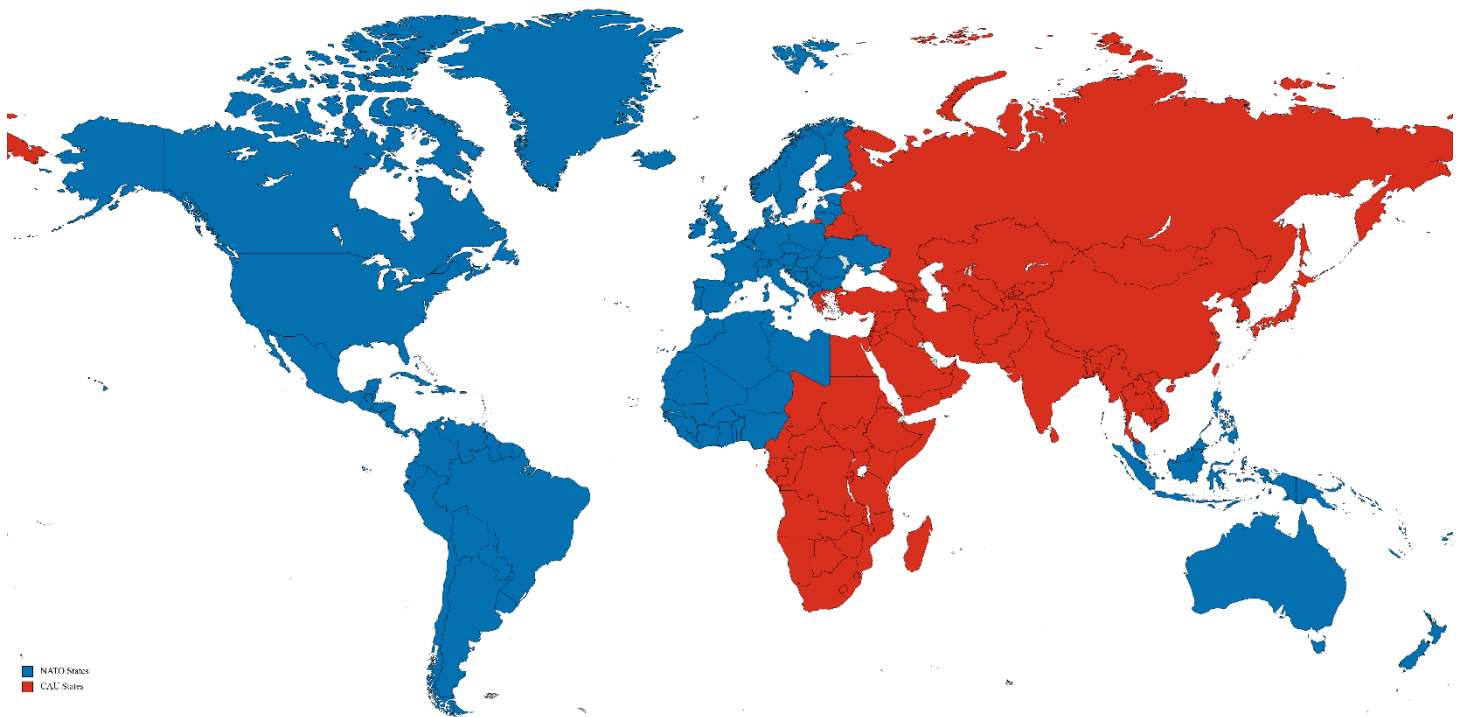

Just a few days after our successful Operation in Southern Libya, the majority of our forward positioned Airfields in southern Europe got attacked by a until now unknown weapon. Devastating earthquakes turned the bases into massive craters, destroying all infrastructure, vehicles and killing thousands of our Troops.

Reconnaissance and Intelligence have been working day and night trying to figure out what actually happened. Currently all evidence indicates that the attacks are linked to the Convoy

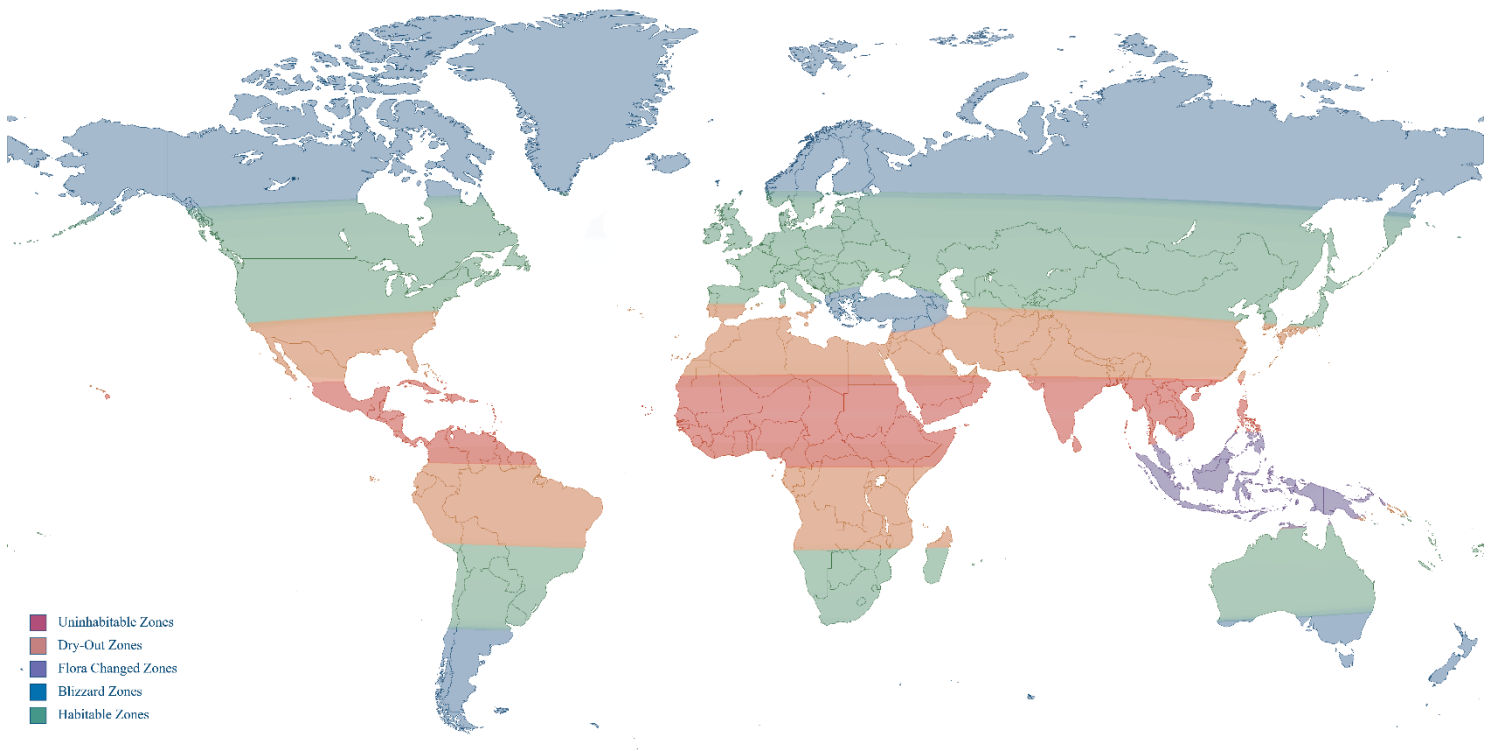

which we failed to intercept in Southern Libya and the “Agolar Space Elevator”, which is located on Altis Island in Greece.

The “Central Asian Union” (CAU) has recently deployed increasing numbers of Troops to the island and also reinforced defences its defences. NATO High Command reckons that the CAU is conducting the research for their new weapon (“Codename: Earthshaker”) on Altis and designated the islands capture as the new priority target.

You are part of the 3rd NATO Infantry Battalion, Last Resort Company, about to be deployed to Altis and tasked with securing Intel on the “Earthshaker” Weapons Program.
