## • SITUATION

### **Who are we? What has happened?**

The year is 1986, the GDR (German Democratic Republic) economy is cracking down as the Soviet economic support is pulled. Intelligence states that the party leaders in a desperate attempt to keep the population under control, have decided that a battle victory will keep the people at ease. Taking back West German resources and technology, this will immediately increase their status.

In the last couple of days, east German reconnaissance vehicles and troops have been spotted crossing the fairly open borders in the country side. Their target is likely the NATO airbase as destroying this, reduces any chance of rapid re-enforcement.

The 11<sup>th</sup> Hour Armoured Battalion battlegroup have been moved in the area, using a local farm preventing to get seen by East sides recon planes.

About 30 minutes ago, the Border guard station radioed in an emergency broadcast that they were targeted by GRD artillery. Communication is lost shortly after.

A full scale attack is to be expected
