1. SITUATION

Who are we? What has happened?
Since the last engagement the rebel forces have retreated back to the south and the chinese have advanced to an important coms-location. Both parties have several disputes at this point , so now is the time to strike. Our task force is still mostly on it's own so we will perform a night raid on the comms location and gather all Intel we can whilst destroying as much chinese equipment and AA installations as we can. We also expect Intel on locations for the rebel HQ to be found in the area. For this op we will be utilising a false flag operation to provoke a rebel attack. We also need to find out where the rebels are now sourcing their supplies from. In order to do that we will need to find their HQ and raid it for Intel as well.

2. MISSION

What are we going to do about it?
Mission Critical Objectives: •   **Disable mountain base equipment** •   **Get Intel about foreign support** **Secondary Objectives:** •   Destroy Artillery outpost •   Take the mountain outpost •   Gather all Intel you can
